

## RC202-C3 STM-1 Media Converter

RC202-C3 is an STM-1 (155Mbps) media converter that performs the conversion from STM-1 coaxial cable to fiber optic and vice versa.

It is especially useful when carriers are deploying new STM-1 equipment with old ones. Because old version STM-1 equipment is always equipped with BNC interface, while new ones with optical interface. RC202-C3 could be

used between them as an independent device.

It could also be used in point-to-point topology to effectively extend the transmission distance of STM-1 coaxial cable. Additionally, different transmission distances can be customized by ordering different fiber optic interfaces.
