CABLE MANAGEMENT AND POWER DISTRIBUTION

## MC Snake Tray Installation Instructions

photo 1

photo 2

Cable Management Solutions MC Snake Tray is designed to contain and route MC cables in an overhead application against a concrete deck. As such, the MC Snake Tray is to be mounted to the under side of the concrete deck with a recommended span of 4 feet. The tray is to be secured to the deck with a minimum of 1/4" anchors in compliance with local building codes and regulations. MC Snake Tray is to be mounted using the built-in "Snake Eye" mounting rings which are located along the center spine of the tray at one foot intervals, see photo 1. Sections of the MC Snake Tray are to be connected to each other using the inline tray connector part number CB-12, see photo 2.
