

MANAGED CABLE MINDER

Managing cables within a rack or cabinet doesn't have to be a hassle. The Kendall Howard 1U Managed Cable Minder offers a simple solution for routing cables from patch panels, routers, switches, or any other component installed within your rack. With 28 independently rotating clips, you'll find that organizing your network cables has never been easier.

FEATURES

Nylon Cable Management Clips - 28 semi-hard micro clips can all be rotated individually which allows for easy cable routing in any direction. Latch gate style clips can be locked so that cables will not slip out once mounted.

Slim Profile - 1U (1.75") profile provides the cable management you need without using a lot of your valuable rack real estate.

EIA Compliant - Standard 19" mounting width is compatible with all standard 19" EIA compliant racks and cabinets. Whether you need to organize cables in a wall mount rack or a large server cabinet, the managed cable minder will get the job done.

Flanged Mounting Panel - Mounting panel is flanged on both the top and bottom for added strength and rigidity.

SPECIFICATIONS

Part Number	1903-3-000-01
Width	19"
Depth	2"
Height	1.72"
Material(s)	CRS (Cold Rolled Steel)

Finish/Color	Black Powder Coat Finish
UPC	879447000207
Warranty	Limited Lifetime Warranty
Shipping Method	FedEx Ground
Nylon Clip Specifications	Material: Nylon 6/6 Flammability Certification: UL94V-2 Temperature Index: 185°F (85°C)
