

Armored Cable Cutter

- *Specifically designed to work on MCAP[®]*
- *Fast, clean cuts in just a few spins of the handle*
- *Aircraft aluminum construction for strength and light weight*
- *Works on all popular types of armored cable up to 3/8" diameter:*
 - BX
 - AC
 - MC
 - MCAP[®]
 - Greenfield

MCAP[®] is a Registered Trademark of Southwire Company, Carrollton, GA

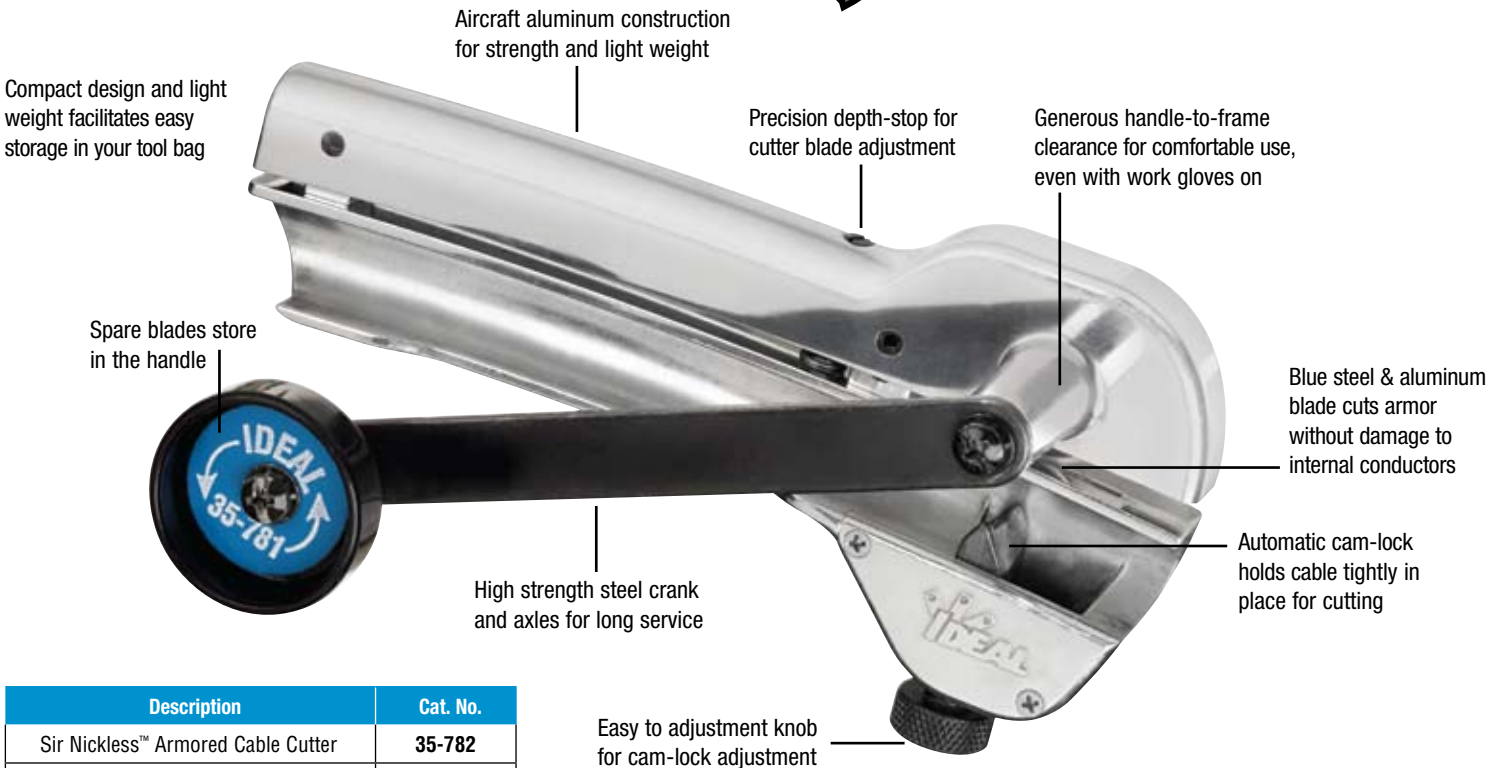

Armored Cable Cutter

Sir Nickless™

TO SEVER AND PROTECT ARMORED CABLE™

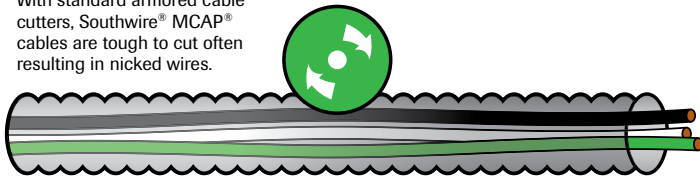

Unnecessary nicks in armored cable wire insulation cause rework, call-backs and possible arc-faults. The Sir Nickless Armored Cable Cutter protects armored cable wires by drawing wires down, creating an air space above the wires, providing room for the cutting blade to shear through and sever the armored casing without nicking the wires within.

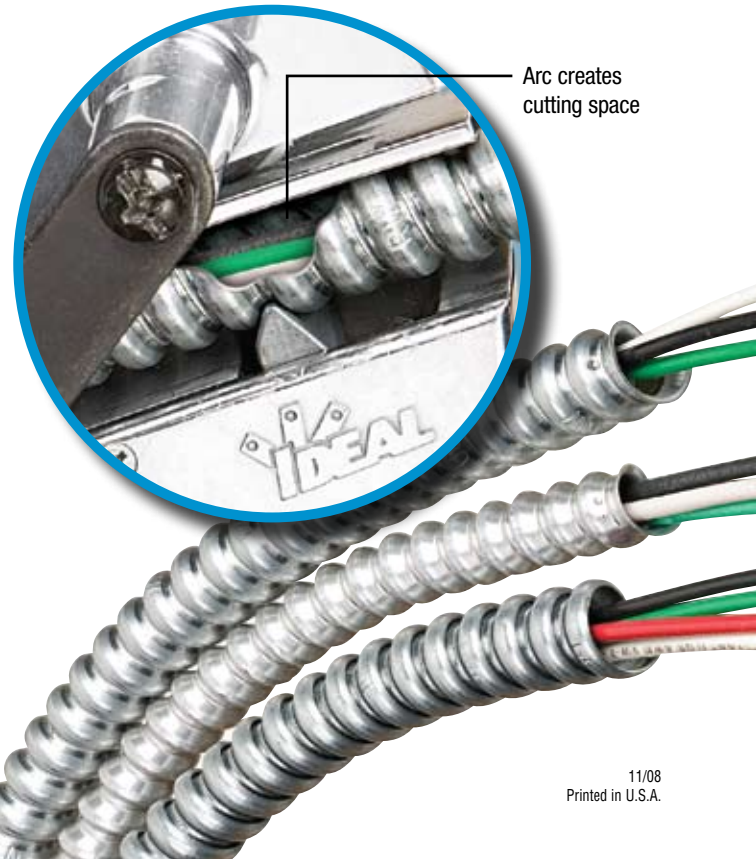

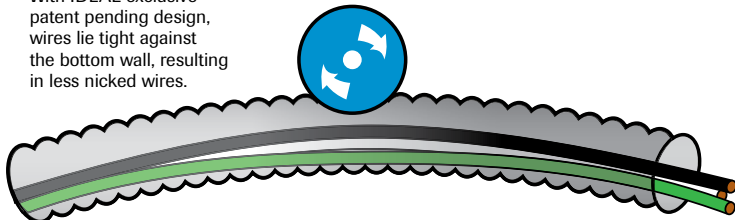

Description	Cat. No.
Sir Nickless™ Armored Cable Cutter	35-782
Replacement Blade	35-781

Standard Armored Cable Cutters vs. IDEAL Sir Nickless

With standard armored cable cutters, Southwire® MCAP® cables are tough to cut often resulting in nicked wires.

With IDEAL exclusive patent pending design, wires lie tight against the bottom wall, resulting in less nicked wires.
