

100 µm Low OH PYROCOAT® Step-Index Optical Fiber

P/N: CF04406-11

Overview

Low OH concentration optimizes these fibers for use in the near-IR wavelengths. Biocompatibility features make these fibers ideal for laser surgery and other medical applications.

The all-silica base construction also creates a high damage threshold and high-performance optical properties.

High temperature environments require the use of PYROCOAT® polyimide coating.

Typical Applications

Illumination
Laser Surgery
Laser Welding and Cutting
Radiation Analysis
Sensors
Visible to Near-IR Spectroscopy
