Product Description

The OFS LGX® Combination Shelves are the original optical fiber frame solution. Customize your installation with this fast installation design. These units are a combination of 7" or 9" Termination Shelves with splice units and fanouts installed. Ask OFS to create your custom configuration from as small as 12 fibers up to our grand 864 fiber solution. All combination units are factory assembled allowing a rapid installation. Direct splicing in single or mass fusion configurations are available. Select from existing designs or work with your local representative for a customized solution.

The LGX Combination Unit is a versatile system of optical cable management boxes, which can be configured in many ways. Mix and match adapter panels to configure your system with LC, SC or ST type adapters. The pre-assembled system allows for rapid frame mounting, the elimination of a cable entry transition box (proper fire ratings must apply) and removes infield assembly work. Contact OFS to help with pre-assembled configurations which speed installation time.
