LSR1U-072/12 105361430 Replaced by LSC00-072-12-E/W(1)LT1B-MF (300517232)
LSR1U-144/19 105361422 Replaced by LSC00-144-14 (300447125) and one tray LT1B-MF (300386935)
LSS1U-215/5 105361448 Replaced by LSS1U-072/5 (105335806) and one tray LT1B-MF/MF (300386935)

This is to formally announce that the Ribbon Fiber Combination and Ribbon Splice Shelf will be discontinued and replaced by the Combination Shelf and Splice Shelf that utilize the sliding splice organizer trays.

Discontinued Availability date is 3/15/2005. This product has not been available for some time and there is a replacement option.

Reason for the change: New offerings are a more cost effective solution. The replacement shelf LSC00-072-12-E/W(1)LT1B-MF (300517232) comes equipped with one mass fusion splice tray. The bottom portion of the combination shelf is the splice shelf. The splice shelf can handle 3 splice trays either mass fusion or single fusion splicing by selecting the splice tray LT1B-F/F (300386919) for single fusion and LT1B-MF/MF (300386935) for mass fusion. The single fusion tray will secure 48 single fusion splices and the mass fusion tray will secure 18 mass fusion splices (216 fibers when using the 12 fiber mass fusion splice)

Please contact your sales representative if you have any questions.

Combination shelf : One termination shelf and one splice shelf. The termination shelf can handle 96 (8 port panel) terminations or 72 (6 port panel) terminations. Shelves are available empty or equipped with (E/W) panels, adapters and splice trays.
