**SPECIFICATIONS/DETAILS** Riser MicroDucts are made from fire retardant materials which are fully approved by the American ETL (Electrical Testing Laboratories) for Riser applications. ETL LISTED to UL-2024 & CSA C22.2 No.262-04 and UL-94 V-0 & CSA FT-4

**FILL RATIO** Choose the correct MicroDuct size based on the Outer Diameter (OD) of desired MicroCable. Dura-Line recommends a fill ratio of 50% to 75% for optimal cable placement performance. Several factors impact jetting distance including the condition of route, bends, and equipment.

**CONDUIT MARKINGS** Permanent marking along MicroDuct includes: material, relevant standards, production info, and sequential feet or meter markings. Custom options available.

**CO-EXTRUDED LINING** SILICORE® is co-extruded with the HDPE jacket creating a super slick permanent lining for higher speed cable jetting and longer, easier cable pulls.

**INTERNAL RIBS** Standard (except 3.5mm ID which are designed with a standard smooth interior)

**OPTIONS**

**PRE-INSTALLED STRING** Factory pre-installed Pull String available in MicroDucts to aid in cable placement.

**PRE-INSTALLED FIBER** Fiber cable or cordage can be factory pre-installed in MicroDucts
